

Smart LED Lighting Optimization Program

Smart Monitoring and
Control Capabilities

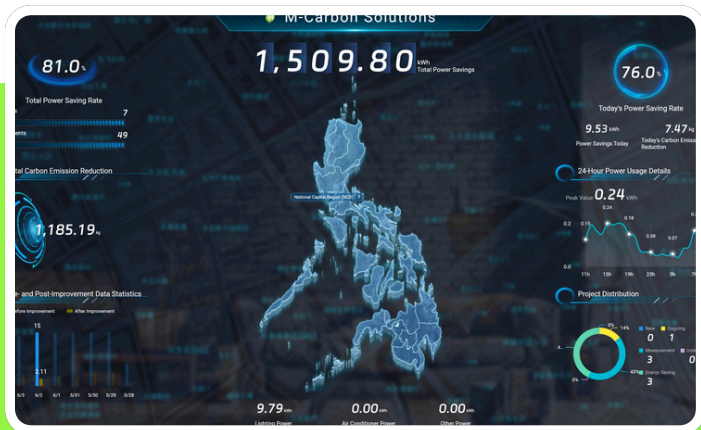

Enhanced Lighting
Quality and Lifespan

Zero-Upfront-Cost
Programs Available

Why
Partner
with INES

Delivering Measurable Results

Our integrated lighting optimization solutions combine high-efficiency LED technology, intelligent controls, and energy monitoring capabilities to help organizations improve operational efficiency while supporting sustainability initiatives.

Smart LED IoT

LED T8 IoT

0-18W

**180 lm/W
efficacy**

**6500K daylight
output**

**100,000-hour
lifespan**

M-CARBON LED		CONVENTIONAL LED
Power Consumption 0-18W Adjustable		Power Consumption 18W Fixed
Lifespan Up to 100,000 Hours		Lifespan 10,000-25,000 Hours
Light Output Up to 3,240 Lumens		Light Output Approx. 1,980 Lumens
Operating Temperature 30-45°C		Operating Temperature 55-70°C
Warranty Up to 7 Years		Warranty Typically 1 Year
IoT Features Smart Controls, Dashboard Monitoring, Energy Tracking		IoT Features None

LED Always-On Series

LED T8 Always-On

200 lm/W
efficacy

6500K daylight
output

8 Watts

LED T5/T6 Always-On

1160*19mm

6500K daylight output

8 Watts

LED Bulb Always-On

E27 Base

5 Watts

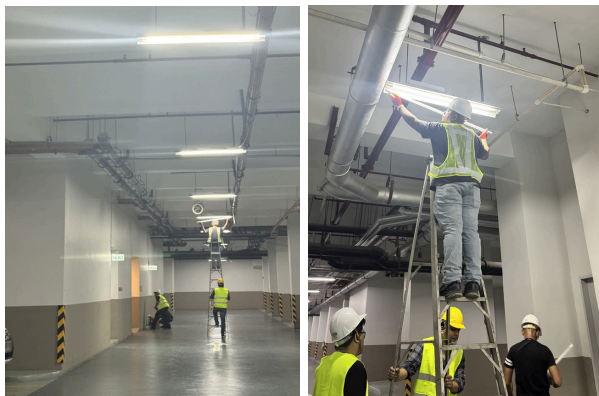

6500K daylight
output

Project References

The following references highlight Smart LED Lighting installations performed across various facilities.

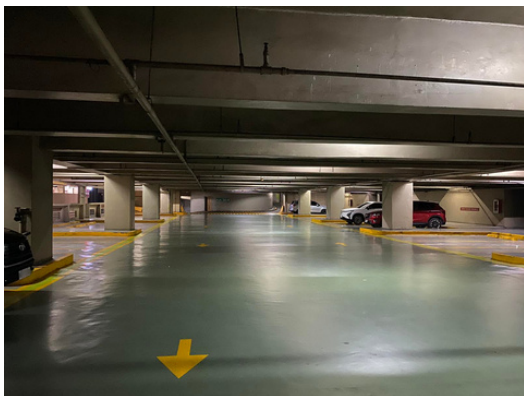

Residential Condominium Parking

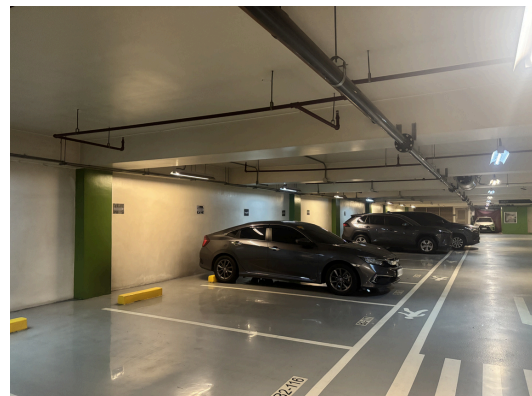

Hotel Kitchen Facility

Mall Parking

Office Building Parking
